“Seasoned Django Developer specializing in delivering high-impact web solutions that streamline operations and enhance user experiences, demonstrated through projects such as 'The Hallway Victoria' and 'Expert Evaluator”

Skills

Python | Java | Django | Machine Learning | Html | JavaScript | CSS | React | MySQL | Pentaho| Pandas| Numpy |Git

Work Experience

Freelancer | Django Developer

August 2023 - Present

- Engineered "The Hallway Victoria" website, amplifying the restaurant's online presence through custom Django-based solutions.
- Optimized a user-friendly website with seamless integration of frontend technologies, leading to a 35% increase in customer interaction and a 20% increase in online reservations.

Bebo Technologies Pvt Ltd | Intern

February 2023 - July 2023

- Engaged in an intensive web development boot camp, mastering foundational knowledge and proficiency in database management.
- Contributed to the development of the Expert Evaluator system, enhancing assessment accuracy with ChatGPT, Python, Django, and JavaScript.

Projects

The Hallway Victoria

- Spearheaded the creation of "The Hallway Victoria" website, utilizing Django, HTML, CSS, and JavaScript to deliver a visually appealing and user-friendly online presence for the restaurant.
- Pioneered and executed a comprehensive web development project for "The Hallway Victoria," focusing on establishing a robust online presence that effectively showcases the restaurant's ambiance and menu offerings.
- Transformed the user experience by implementing intuitive navigation and interactive elements, resulting in a 25% increase in customer engagement and a 15% increase in online reservations.

Expert Evaluator

- Innovated the Expert Evaluator platform at Bebo Technologies, integrating ChatGPT, Langchain, OpenAI API, Python, Django, HTML, CSS, and JavaScript to offer a customized skill assessment and interview simulation experience.
- Designed and developed the Expert Evaluator system, providing users with personalized skill assessments and real-world interview simulations to enhance job preparation and performance.
- Integrated AI technologies to deliver personalized performance evaluations; boosted user skill development by 40% through precise assessments and actionable insights tailored to individual needs.

College Grievance Application

- Devised a College Grievance Application using HTML, CSS, Python, Django, Jinja templates, and SQLite3, facilitating an intuitive platform for efficiently managing student grievances within educational institutions.
- Spearheaded the creation of a College Grievance Application, a web-based solution designed to streamline the process of submitting and managing student grievances in educational institutions, improving communication.
- A user-friendly platform that enables students and faculty to address concerns transparently and effectively enhancing the educational experience by providing a transparent way for students to voice their concerns.

Education

Rayat Bahra Institute of Engineering and Nano technology, India

July 2019 – May 2023

- Btech in Information Technology

Certifications & Achievements

- Python A-Z: Python for Data Science with Real Exercises! | Udemy, 2020
- Internship Certificate | Bebo Technologies, 2023
Completed a comprehensive internship program in web development, gaining hands-on experience in database management and collaborative project development.
